

## Amazing Aspiration for Education

Drop one, Drop one, day by day makes an amount and builds up children dream. Money is essential for education, education is essential for life no doubt about it but what way? Bangladesh is a one of the developing country in the world. Most of the people live on under the poverty line a large proportion of them are in Dhaka urban slums. The Primary level education in Bangladesh is free for all school age children; our country has made remarkable progress in primary education over last few years. There are more than 18 million children of primary school age (6-10 years) in Bangladesh out of a total population of 137 million. Almost half of them are girls. Gross enrolment has increased to 97.5 per cent, whereas net enrolment is 82 per cent, and there are equal numbers of boys and girls in primary education. (UNICEF)

Children are Displaying their Education Bank

One third of children drop out before they have completed five years of primary education But many of reason most of slum children do not attend school. The slums parents have no aware about important of education and no extra savings money for children education or they have no interest exchange for education. Most of the children always wanted to go to school but never had the chance to attend one. In our country, hundreds of thousands of children like are struggle for survival every day. There is an insurmountable battle – one that is waged from the very day they are born. Is there really nothing we can do to change this situation?

SOHAY a non government organization working with the slum children from last 6 years through primary education and improving their basic health. In the part of this activities SOHAY improving friendly educational environment and organize group educational system in slum area under UDC (Urban Development Centre). SOHAY motivated children & their parents about important of education through different picture show (Picture slide of module). SOHAY also motivated children & their parents for savings through education. Actually main theme of the savings is education, children buy a mud bank and drop money all year, after ending the year they broken their bank and exchange money for their education. Children save money from their extra food like chocolate, ice cream e.g.: The facilitator of UDC monitoring this savings process and insure exchange money for education. Roton ,Jamal ,Munni and all of primary students of SOHAY savings money for their education and look bright opportunity. This savings method is fundamental helpful and innovative for child education. We want this practice establish all over the country.

If you want to see this story please come on SOHAY, UDC (Urban Development Centre). We are looking for your approaching.
